### 1 [Special issue on knowledge representation](#)

Ronald J. Brachman, Brian C. Smith

 February 1980 **ACM SIGART Bulletin**, Issue 70

Publisher: ACM Press

 Full text available: [pdf\(13.13 MB\)](#) Additional Information: [full citation](#), [abstract](#)

In the fall of 1978 we decided to produce a special issue of the SIGART Newsletter devoted to a survey of current knowledge representation research. We felt that there were two useful functions such an issue could serve. First, we hoped to elicit a clear picture of how people working in this subdiscipline understand knowledge representation research, to illuminate the issues on which current research is focused, and to catalogue what approaches and techniques are currently being developed. Second ...

### 2 [An architecture for voice dialog systems based on prolog-style theorem proving](#)

Ronnie W. Smith, Alan W. Biermann, D. Richard Hipp

 September 1995 **Computational Linguistics**, Volume 21 Issue 3

Publisher: MIT Press

 Full text available: [pdf\(2.76 MB\)](#) [Publisher Site](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

A pragmatic architecture for voice dialog machines aimed at the equipment repair problem has been implemented. This architecture exhibits a number of behaviors required for efficient human-machine dialog. These behaviors include: (1) problem solving to achieve a target goal (2) the ability to carry out subdialogs to achieve appropriate subgoals and to pass control arbitrarily from one subdialog to another (3) the use of a user model to enable useful verbal exchanges and to inhibit unnecessary ones( ...

### 3 [Special issue on natural language generation: Generating natural language summaries from multiple on-line sources](#)

Dragomir R. Radev, Kathleen R. McKeown

 September 1998 **Computational Linguistics**, Volume 24 Issue 3

Publisher: MIT Press

 Full text available: [pdf\(2.36 MB\)](#) [Publisher Site](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

We present a methodology for summarization of news about current events in the form of briefings that include appropriate background (historical) information. The system that we
